TERMS OF BUSINESS.

All orders will be executed as promptly as possible. The greatest care is exercised in packing, and we cannot hold ourselves responsible for any delay or damage in transit to the goods.

All accounts are due nett at the half years, Midsummer and Christmas. A discount of five per cent. is allowed for cash within six weeks of invoice date.

Payment may be made to St. Albans by Cheque or Post Office Order, or Bills can be drawn as desired.

For first transactions cash should be sent, or satisfactory references.

In ordering, please mention Railway Station to which goods should be sent.

Complaints cannot be entertained unless made within three days after receipt of goods.

As we grow Orchids only at St. Albans, empties are of no value to us, and will not be allowed for. The absolute cost price only is charged.

Owing to the amalgamation of the General Steam Navigation Company and the Cockerill Line, the freight charges have been altered, and we now charge 2/6 each for packages and baskets to London, and send the goods free to Commercial Road Dépôt. This charge also includes all expenses in London on goods for places beyond. We also allow 2/6 each on packages and baskets to Goole, Hull, and Leith.

SANDER & SONS, LTD.

AZALEA INDICA.

Acacia grandis.

A fine decorative subject, producing myriads of golden ball-like blossoms on short spikes.

Good Bushes, 2 to 3 feet high	...	...	3/-	4/-	and 5/-	each
Standards, 18—24 inch stems, nice heads			3/6	4/-	and 5/-	each

Acacia paradoxa.

A variety of Armata, nearly hardy, very floriferous ; flowers deep gold.

Good Bushes, 15 inches to 18 inches	12/-	and 18/-	per doz.
Stronger „ 18 inches to 24 inches	...	...	2/6 each
„ „ 24 inches to 36 inches	...	...	3/6 each

Acacia verticillata.

Distinct, narrow verticillate foliage, canary yellow flowers produced on short spikes.

Good Bushes, 3 to 3½ feet high	...	...	7/6	each
--------------------------------	-----	-----	-----	------

Aucuba Japonica variegata.

Bushes in pots, 24 to 30 ins. high, 18 to 24 ins. diameter,	18/-	and 24/-	per doz.
---	------	----------	----------

Acalypha Sanderi.

One of our most striking introductions. So free flowering is it that an inflorescence is produced from every point. The flowers take the shape of a tail-like process often 2 feet long, of a glowing scarlet.

Plants, about 9 inches high	...	...	...	1/-	each
„ 12 to 18 inches high	...	...	..	2/6	each

Æschynanthus speciosus.

Flowers bright red and orange yellow.

Good Plants	...	...	2/6, 3/6, and 5/-	each
-------------	-----	-----	-------------------	------

Aglaonema picta.

A dwarf erect growing Aroid, with light green leaves prettily blotched with grey.

Good Plants	...	...	2/6 and 3/6	each
-------------	-----	-----	-------------	------

Allamanda Hendersoni.

Good Plants 2/6, 3/6, and 5/-

Alocasias.

Handsome and distinct stove decorative plants. The bulbous root stocks produce several leaves of great substance and size, usually so glossy as to have a metallic appearance, and richly ornamented in various shades of green, bronze, silver, etc.

Alexandræ	...	...	...	good plants	5/- and 7/6 each
argyræa	...	...	...	„	5/- and 7/6 each
Kerchoveana	...	...	...	„	5/- and 7/6 each
Lindeni	...	...	...	„	5/- and 7/6 each
nobilis	...	...	...	„	7/6 and 10/- each
Sanderiana	...	...	...	„	10/6 and 20/- each
Sanderiana var nobilis	...	...	...	„	20/- and 30/- each
spectabilis	...	...	...	„	5/- and 7/6 each
Thibautiana	...	...	...	„	5/- and 7/6 each
Watsoniana	...	...	...	„	10/- and 20/- each
Wavriniana	...	...	...	10/-, 20/- and 30/-	each

Alpinia Sanderæ.

A splendid decorative plant of recent introduction, with reed-like stems, bearing glossy green leaves, beautifully variegated with pure white and flecked with rose.

Fine Plants 5/-, 7/6, and 10/6 each.

Alpinia vittata.

Well-known, reed-like in habit, foliage beautifully marked in green and creamy white.

Fine plants 2/6, 3/6 and 5/- each

Anthurium Andreanum.

Splendid flowering plants, producing large long-lasting spathes, varying in colour from white, pink, rose, to deep sealing wax red. We can offer strong flowering plants in variety.

Our selection at 60/- and 80/- per dozen

Anthurium crystallinum.

A boldly leaved decorative plant, with deep velvet-like green leaves, strongly veined with silvery-green.

Good Plants 5/-, 7/6, 10/6 and 21/- each

Anthurium magnificum.

A splendid plant, boldly effective, and a fine companion to *A. crystallinum*.

Good Plants 5/-, 7/6, and 10/6 each

Anthurium Schertzerianum.

A splendid strain of this beautiful vermilion spathed decorative plant. The result of careful selection and cross fertilizing of the finest forms.

In varying shades of white, red, and salmon pink to vermilion.

Strong Plants 18/-, 24/- and 30/- per doz.

VAR. MME. DALLIERE, very large rose flesh spathe.

Good Plants 5/- and 7/6 each

Prices of special varieties and colours on application.

Anthurium Rothschildianum.

We have a splendid strain of this beautiful form. The spathes large, finely shaped, and beautifully coloured in white and varying shades of vermilion, scarlet, red, etc.

Good Plants 5/-, 7/6 and 10/6 each

Special varieties, prices on application.

Anthurium Veitchii.

In large plants, the leaves are often 4 feet long, of a beautiful metallic green.

Good Plants 5/-, 7/6, 10/- and 15/- each

Aralia.

Beautiful decorative plants, with finely cut foliage.

elegantissima, good plants,	10—12 inches	... 1/6 and 3/- each
gracillima	10—12 inches	... 1/6 and 2/- each
Kerchoveana	10—12 inches	... 1/6 and 3/- each
Sieboldi variegata	9—12 inches	... 1/6 and 1/6 each
Veitchii	10—12 inches	... 1/6 and 2/- each

Araucaria excelsa.

We have an immense stock of this charming and useful decorative plant, and annually grow an enormous number under the most careful supervision. The special climatic conditions which prevail here exactly suit this distinct conifer, and we can offer exceptionally sturdy and healthy plants. All are from carefully selected tops.

Good Plants, 6 inches to 9 inches high	60/- per hundred
Fine Plants of $2\frac{1}{2}$ tiers	100/- per hundred
„ „ „ $2\frac{1}{2}$ to 3 tiers	15/- per doz.
„ „ „ $3\frac{1}{2}$ tiers	24/- per doz.
„ „ „ 4 to 5 tiers	36/- per doz.
„ „ „ 4 to 5 tiers, extra fine specimens,	6/- each

Araucaria excelsa glauca.

Resembling excelsa in habit, but the foliage has a soft silvery glaucous tint.

Good Plants of $2\frac{1}{2}$ tiers	24/- per doz.
Fine Plants of $2\frac{1}{2}$ tiers	30/- per doz.
„ „ „ 3 tiers	3/6 and 5/- each
„ „ „ 4 to 5 tiers	10/- each

Araucaria Baumannii.

A stately growing species with very broad, thick, glaucous, almost blue tinted leaflets.

Good Plants of 2 tiers, 6 inches high, 2 feet broad, 10/- and 12/- ea.
 „ „ „ 3 tiers 20/- each

Araucaria Bidwillii.

Very distinct in habit, leaflets broad and flat, dark shining green.

Good Plants, $2\frac{1}{2}$ to 4 tiers 6/- and 12/- each

Araucaria Cunninghamii.

A noble form, much more dense than *A. excelsa*, with broader fronds and shorter pinnæ.

Good Plants, $2\frac{1}{2}$ to 3 tiers 12/- each

Araucaria Cunninghamii glauca.

A variety of the preceding of a charming glaucous hue.

Fine Plants, 3 tiers, 15 inches high 20/- each
 Sturdy Seedling Plants, 3 to 5 inches high 5/- each

Araucaria elegans.

The foliage of this rare and beautiful *Araucaria* is a dark sombre green. The branches incline upward, giving a very distinct appearance to the plant.

Fine Plants of 3 tiers 10/- each
 „ „ „ 4 16/- each
 „ „ „ 5 24/- each

Araucaria robusta.

A handsome form of *excelsa*, distinct and imposing by reason of its greater vigour and darker green foliage.

Strong Plants of 2 to $2\frac{1}{2}$ tiers 36/- per doz., 4/- each
 „ „ „ 3 tiers 6/- each
 „ „ „ $3\frac{1}{2}$ to 4 tiers 8/- each

Araucaria Sanderiana.

A form of excelsa, but abundantly distinct, with very broad branches densely set with leaves and shortly jointed stems.

Good Plants of 3 tiers 20/- each

Ardisia crenulata.

A beautiful shrubby cool-house plant, with deep green leaves, and in winter, bunches of scarlet holly-like berries.

Good bushy well-berried plants 15/- and 18/- per doz.

Aristolochia gigas Sturtevantii.

A stove climber, producing enormous boat-like blooms, greyish green reticulated with purple maroon.

Strong Plants 10/- and 20/- each

Aristolochia Elegans.

Flowers coloured much as in *A. gigas* but smaller and produced with great freedom.—5/- and 7/6 each.

Aristolochia tricaudata.

A shrubby species, producing deep chocolate maroon three-tailed blossoms with great freedom.

Good Plants 7/6 and 15/- each

Asparagus.

Useful both for decoration and for cutting purposes.

Asparagus	Duchesnei	...	...	good plants	5/- each
"	Madagascariensis	...	...	small plants	2/- each
"	Myriocladus	...	...	good plants	5/- each
"	Springeri	...	...		12/- per doz.

Aspidistra elatior.

These plants are grown as cool as possible and possess great vigour and hardiness. They may be had either in pots or taken direct from the beds. We hold an enormous stock.

Fine Plants, green,	7 to 8 leaves	...	...	12/- per doz.
"	"	"	9 to 10	15/- per doz.
"	"	"	14 to 15	24/- per doz.
Fine Plants, variegated,	7 to 8 leaves	...	...	24/- per doz.
"	"	"	9 to 10	30/- per doz.
"	"	"	14 to 15	50/- per doz.
By the leaves, green	...	...	...	12/- per hundred
"	"	variegated	...	30/- and 32/- per hundred

A GROUP OF OUR AZALEA INDICA, GHENT QUINQUENNIAL EXHIBITION.
FIRST PRIZE.

Azalea Indica.

We have an enormous stock of the best selected varieties of this popular and beautiful flowering plant. We employ a large staff of experienced men, and with skilled supervision and the advantage of climatic conditions exactly suitable to their culture, we are enabled year by year to put forth plants which, by the richness and depth of colour, and the immense number of blooms produced on each plant, offer great advantages to the purchaser.

The selection may with every confidence be left to us, but we have pleasure in appending a list of the best and most popular commercial varieties, and also a second list of less known but equally beautiful kinds, from which any particular colour and shades may be selected.

Strong, heavily-budded plants, with well ripened wood.

About 10 inches in diameter, well budded	... £3 per hundred
" 12 " " " " " "	... £4 per hundred
" 12 to 14 inches in diameter, well budded	£5 per hundred
" 14 to 16 " " " " " "	£8 per hundred

Sizes and prices of specimen plants on application.

Pyramids.

Carefully shaped plants of superior quality, thickly set with buds from base to apex.

About 18 inches high		3/- each
" 24 " " " " " "		5/- each
" 26 " " " " " "		7/6 each
" 30 " " " " " "		10/- each
" 30 to 36 inches high		14/- each

Azalea Indica, Commercial Selection.

APOLLO—Semi-double brick red; early.

BERNHARD ANDREAS ALBA—Double white; late.

CAMELLIÆFLORA—Double, rose terra-cotta; early.

DEUTSCHE PERLE—Double, pure white, greenish centre; very early.

FLAMBEAU—Single, medium, very bright red; late.

HÆRENSIANA—Double white, striped and splashed with rose; late.

JULIUS ROEHRS—Double, large, bright crimson red; late.

J. T. D. LLEWELLYN—Double, flesh colour; late.

- MME. JOS. VERVAENE—Double, brilliant rose, bordered white; early.
- Mlle. MARIE PLANCHON—Large, semi-double, white crisped; medium.
- MME. VAN DER CRUYSSSEN—Double magenta; early.
- MME. MORREAU—Large double, flesh colour and white fringed; medium.
- MME. ROMAIN DE SMET—Double, rose and white; very early.
- NIOBE—Double, white; late.
- PAUL WEBER—Semi-double, red and white; early.
- PRESIDENT OSWALD DE KERCHOVE—Semi-double, rose and white; medium.
- PROF. WALTERS—Single, red and white; early.
- SIMON MARDNER—Double, dark flesh rose; very early.
- SACUNTALA—Double white; early.
- SPIT-FIRE—Double, small, crimson; early.
- VERVAENEANA—Double, white, slightly flaked rose red; very early.
- VERVAENEANA ALBA—Double, white; very early.

General list of Azalea Indica.

We grow about one hundred other varieties of Azaleas, and name the following :—

- ANNA GUNKEL—Large double, white.
- APOLLON—Single, white.
- COMTE DE CHAMBORD—Single, white and rose.
- CHICAGO—Double, light rose and white.
- DR. MOORE—Double rose.
- EMPEREUR DU BREZIL—Large double, rose, bordered white.
- GENERAL POST-MEISTER STEPHAN—Single, fiery red.
- HERMIONE—Double, rose.
- J. B. VARONNE—Single, red and white.
- LA FRANCE—Double, flesh rose and white.
- LUNA—Double, white.
- MME. CAMILLE VAN LANGENHOVE—Double, white, splashed red rose.
- MME. AD. D'HAENE—Double, flesh-colour and white.

- MME. VICTOR CUVELIER—Single, vermilion rose, bordered white.
 Mlle. MARIE ROSSEEL—Double, scarlet crimson, dashed with orange.
 MEMOIRE DE LOUIS VAN HOUTTE—Double, clear rose.
 M. MILLAUD—Double, cherry-red, crisped.
 OBERST VON KUTZINSKY—Double, dark red.
 OTHELLO—Double, dark red.
 PERLE DE GENTBRUGGE—Double, pure white.
 PERLE DE LEDEBERG—Double, white, striped rose.
 RAPHAEL—Double, white.
 SCHRYVERIANA—Double, salmon red, bordered white.
 SOUVENIR DU PRINCE ALBERT—Double, rose and white.
 TEMPERANCE.—Semi-double, lilac mauve.
 UNICA—Semi-double, lilac rose, bordered white.
 VERONICA—Double, cherry red.
-

Azalea Indica Firefly.

Probably the most floriferous and brightest coloured of all Azaleas. The plants are literally smothered in blossoms of a dazzling scarlet crimson. Though single, the blossoms are produced in such profusion as to render this variety one of the most useful for decorative purposes.

Good Plants, well set with buds	...	...	40/- per hundred
Larger Plants, well set with buds	...	...	60/- per hundred
Pyramid Plants, well set with buds, about 9 inches high,			12/- per doz.
Pyramid Plants, well set with buds, about 12 inches high,			18/- per doz.

Azalea Indica Chas. Enke.

A splendid companion to Firefly, with the same habit. The single blossoms of a beautiful rose pink and white are produced with the same wonderful prodigality. This and the preceding variety are among the most striking of Azaleas.

Good Plants, well set with buds, 40/- and 60/- per hundred

Azalea Indica Novelties.

RAISED BY US.

- ANDRE—A magnificent novelty, flowers finely shaped, double, rich rose violet. 4/-
- AMI STEINMETZ—A very large flowered double form, glistening white, beautifully striped and streaked with rose red. 4/-
- BELGICA—A grand form, entirely of a deep brick red tint, very effective. 4/-
- BRUGGENSE—A great acquisition, shape, colour and freedom in flowering, leave nothing to be desired. The flowers are quite double, and throughout are an intense crimson-red. 4/- each
- DEUTSCHE KAISERIN—An ideal, double flower, pure glistening white segments, charmingly fringed. 4/-
- FRAU HEINRICH SEIDEL—The finest single white, magnificent in contour and purity. 4/-
- H. T. PITT—Producing large semi-double flowers of a lively carmine red, very rich. 4/-
- LORELEI—A great acquisition, flowers very large, semi-double, white striped with carmine red. 4/-
- MAGALI—A double flowered form of perfect shape. Very effective as the flowers are of an uncommon shade of lavender red. 4/-
- MEPHISTOPHELES—A splendid large flowered double form, with beautifully undulated petals, entirely of a deep rich red tint. 4/-
- JAMES TAYLOR—A finely shaped, double flower, handsomely streaked with rose, red edged and bordered with pure white. Charmingly effective and very distinct. 4/-
- NIVALIS—A splendid form, producing large snowy-white double flowers. 4/-
- PRINCE LEOPOLD—Remarkable for its beautiful shape and distinct self-colour of a deep red. 4/-
- PRINCESSE ELIZABETH—A very floriferous form, flowers of great size and substance, pure white single. 4/-
- RICORDO DI S. M. HUMBERTO PRIMO—Bears large, finely shaped double flowers of exceptional size and substance. Brilliant rose in colour. 4/-
- TRIOMPHE DE BRUGES—An exceedingly large, finely shaped double flower of a clear, pale rose. 4/-
- WILLIAM WATSON—A splendid companion to Bruggense. Flowers quite as double, beautifully shaped, but of a different shade of red. 4/-

Azalea amoëna.

This pretty species and its varieties are quite hardy except in very exposed positions, and both for planting out, or conservatory decoration should be far more largely used than they are now. All are of compact bushy habit, and bloom most profusely. *A. amoëna* producing bright purple red flowers, their intense colour more than compensating for any deficiency in size.

Fine Bushy Plants 24/- and 36/- per doz.

We have a great variety of larger plants.

Amoëna var. Fosteriana.

Flowers deep red violet.

Fine Plants 3/-, 5/- and 7/6 each

Amoëna var. rosea.

Flowers, bright rose 3/-, 5/- and 7/6 each

Amoëna var. alba.

Flowers pure white.

Small Plants 4/- and 7/6 each

Azalea rosæ-flora, syn. balsamæflora

Habit resembling that of *amoëna*, quite as hardy, and producing beautiful double rosette-like flowers of a clear rose.

Fine Bushy Plants ... 18/-, 24/-, 36/-, and 48/- per doz.

Azalea glauca stricta.

A hardy deciduous Azalea, the habit resembling that of *A. mollis*. The foliage is of a deep glaucous green, and the flowers are pure white, sweetly scented, and produced in bunches during the late summer.

Good Plants 5/-, 7/6 and 10/- each

Azalea mollis seedlings.

We have a very large stock of these very beautiful, hardy, profuse blooming, forcing Azaleas. The plants are well shaped, well ripened, and full of buds. The flowers are produced in many varying tints of yellow, rose, salmon, orange, etc.

Bushy Plants, 20 to 30 buds	...	...	...	50/- per hundred
„ „ 30 to 40 buds	...	...	...	60/- „ „
Strong Plants, 40 to 50 buds	...	...	...	80/- „ „
„ „ 60 buds	...	...	...	100/- „ „

Azalea mollis hybrids.

Selected hybrids of mollis, very floriferous, easily forced, very useful for planting.

CHARLES ROGIER—White, shaded with violet.

DULCINEE—Salmon red.

EDISON—Bright red, spotted with yellow.

ESMERALDA—Red.

FRERE ORBAN—White, shaded with yellow.

GENERAL COFFINET—Violet.

MR. DESBOIS—Vermilion red.

PRINCE BAUDOUIN—Bright red.

SOUVENIR DE LOUIS VAN HOUTTE—White, shaded with rose.

Strong Plants 24/-, 36/- and 48/- per doz.

Azalea mollis x Sinensis.

These beautiful hybrids add a novel and very attractive feature to the outside garden, and are a decided acquisition to our forcing plants. They combine the long lasting properties of *A. Sinensis* with the attractive beauty and floriferousness of *A. mollis*. The flowers are produced in clusters and are of value for cutting, but it is as forced plants, or when massed in beds on lawns, etc., that their varied colouring is seen to full advantage. Practically every shade of colour is now included—pure white, soft yellow, canary yellow, yellow ochre, pink, lilac, red, rose, carmine, cerise, etc.

Strong, bushy plants, well budded. Our selection, unnamed, 18/-, 24/-, 36/- and 48/- per doz.

NAMED VARIETIES.

ANTHONY KOSTER—Golden yellow.

DR. REICHENBACH—Salmon.

EMIL LIEBIG—Salmon.

FRANS VAN DER BOM—Salmon.

HORTULANUS WITTE—Orange.

HUGO KOSTER—Salmon.

N. BEETS—Deep orange.

T. J. SEIDEL—Salmon.

Well-budded Plants in above varieties, 30/-, 36/- and 48/- per doz.

Azalea Altaclarence.

A large bouquet flowered, deep yellow Azalea. Fine for forcing and planting.

Well-budded Plants 18/- and 24/- per doz.

Azalea Davisii.

A fine white cluster flowered forcing Azalea.

Well-budded Plants 18/- and 24/- per doz.

Azalea pontica.

HARDY GHENT OR HONEYSUCKLE-FLOWERED AZALEAS.

These are not only splendid subjects for forcing, but are among the very finest flowering shrubs known. Planted on lawns either in clumps or as isolated specimens the plants are simply masses of lovely flowers in the spring and early summer months.

The following kinds and colours are specially recommended :—

ADMIRAL RUITER—Blood red.

AUGUSTE MICHELYNCK—White.

BEAUTE CELESTE—Bright rose.

BOUQUET DE FLORE—Salmon rose.

CARDINAL—Bright pink.

CHARLEMAGNE—Orange.

COCCINEA SPECIOSA—Orange red.

EMILIE—Crimson.
 FAMA—Lilac rose.
 GEANT DES BATAILLES—Dark red.
 GLORIA MUNDI—Bright vermillion.
 HEUREUSE SURPRISE—Milk white.
 IGNEA NOVA—Carmine.
 JOSEPHINE KLINGER—Crimson.
 NANCY WATERER—Yellow.
 OCCIDENTALIS—White.
 PRINCESSE ADRIENNE—Dark red.
 QUEEN VICTORIA—Rose, white centre.
 REMBRANDT—Crimson violet.
 SANG DE GENTBRUGGE—Crimson.
 UNIQUE—Deep yellow.

Strong Bush Plants, well budded ... 24/-, 30/-, and 36/- per doz.

Azalea rustica flore pleno.

Beautiful hardy double flowered Azaleas, which, like *A. mollis* x *Sinensis*, bear their flowers in trusses. Like them they exhibit a wonderful variety of colour, and are admirably adapted for all forcing purposes or for planting where free flowering deciduous dwarf shrubs are required. In autumn the foliage often acquires glowing tints of red, russet, brown, etc.

Good, sturdy, well-budded plants ... 24/- and 36/- per doz.

Bambusa aurea.

One of the most elegant decorative plants known.

Well-furnished Plants,	5 feet high	6/- and 7/6 each
"	"	"
"	7 feet high	10/- each
"	"	"

Bay Trees, (*Laurus nobilis*).

We stand pre-eminent among growers of Bay Trees, and have always some 30,000 closely grown trees on view, perfect in symmetry, clean and strong. The trees are carefully pruned and grown by experienced men under direct supervision, and the result is seen in the dense, rich green foliage and uniform proportions.

All measurements exclusive of tubs.

Standards.

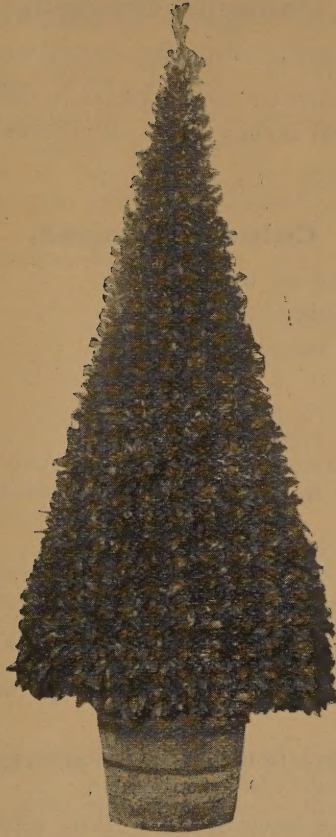

Stems about 4ft. high.

Larger specimens, prices on application. We have them in stock up to 18 feet in height, with a basal diameter of 6 feet.

Begonias.

SANDER'S GIGANTIC ERECT FLOWERING STRAIN.

Incomparable for size, vivid colouring, and vigour of constitution.

Gold Medal at St. Louis International Exhibition, and Gold Medal and First Prizes wherever shown.

For years past we have been carefully selecting and cross-fertilizing our well-known strain, and we now offer exceptional quality in these popular bedding plants. Our single erect flowering strain may be relied on to flower true to colour. The bulbs are sound, carefully cleaned, and without any special treatment produce flowers of intense richness in tint and of great size.

A SPECIALLY FINE STRAIN SELECTED FOR BEDDING AND POT WORK.

Single erect flowering Begonias in separate colours—pure white, deep red, copper, rose, golden yellow, and brilliant scarlet.

Our long years' experience has proved to us that the finest flowers are produced from bulbs 1¼ to 1½ inches in diameter.

DIAMETER OF BULB.

1½ inches	...	...	price 8/- per 100; 60/- per 1,000
1¼ "	...	...	" 6/- " 50/- "
¾ "	...	...	" 3/6 " 30/- "

1¼ "	...	...	" 5/- " 45/- "
¾ "	...	...	" 3/- " 25/- "

Double Begonias.

An exceptional strain, specially selected, like our single Begonias, for bedding and pot work. As in the single Begonias, our experience has shown us that the finest blooms are produced from bulbs $1\frac{1}{4}$ to $1\frac{1}{2}$ inches in diameter.

For pot culture or bedding. The greatest care has been exercised in the selection and improvement of this large Camellia-flowered strain.

In separate colours—white, rose, red, copper, yellow, and crimson.

$1\frac{1}{2}$ inches diameter	...	...	14/- per 100 ; 130/- per 1,000
$1\frac{1}{4}$ " "	...	...	11/- per 100 ; 100/- per 1,000

Begonias.

SPECIALLY GROWN AND SELECTED FOR CONSERVATORY DECORATION,
EXHIBITION PURPOSES, POT WORK, ETC.

Single, large bulbs, to colour...	...	...	16/- per 100
Double, large bulbs, to colour	...	...	35/- per 100

Begonia double fringed.

A superb strain, with splendid pæony-like double blossoms, rich and bright in colour, and very attractive by reason of the beautiful fimbriation or fringe into which the edge of each petal is developed.

Fine Bulbs	...	...	...	...	...	40/- per 100
------------	-----	-----	-----	-----	-----	--------------

Begonia Bavaria.

Compact habit, very floriferous, a rival to Lafayette, but with single flowers of a dark pink.

Fine Bulbs	...	...	...	...	...	35/- per 100
------------	-----	-----	-----	-----	-----	--------------

Begonia Bertini.

FLOWERS BRIGHT VERMILION RED, FUCHSIA-LIKE.

A grand Begonia, specially adapted from its rather tall habit for the centres of beds, window boxes, etc.

Sound Bulbs	...	...	...	...	25/- per 100
Extra Large Bulbs	...	...	...	...	35/- per 100

Begonia cristata.

A grand bedding or conservatory Begonia. The flowers are of our fine single erect flowering strain, but each segment bears a central crest or crests, usually slightly different in tint to the ground colour.

Large Bulbs in 6 separate colours	...	...	16/- per 100
Large Bulbs in mixed colours	...	...	14/- per 100

Begonia Centre Blanc.

A large erect flowering single Begonia, with rose flowers, the centres of which are pure white, varying in size.

Fine Bulbs	...	...	...	...	...	20/- per 100
------------	-----	-----	-----	-----	-----	--------------

Begonia Centre Jaune.

A companion to the foregoing, but with red flowers, having yellow centres.

Fine Bulbs	...	...	...	...	...	20/- per 100
------------	-----	-----	-----	-----	-----	--------------

Begonia fimbriata.

The edges of the segments are beautifully frilled and gophered, giving the flowers a very attractive appearance. The already beautiful colours of the flowers are further enhanced by the varied light and shades caused by the undulations and frills of the petals.

Large Bulbs in 6 separate colours	...	...	at 15/- per 100
Large Bulbs in mixed colours	...	...	at 10/- per 100

Begonia Gloire de Bruges.

A splendid bedder, a grand companion to Lafayette, though slightly taller. Flowers very double, bright rose, with a white centre. So floriferous as to often entirely hide the foliage.

Good Bulbs	...	...	...	1/6 each; £5 per 100
------------	-----	-----	-----	----------------------

Begonia Graf Zeppelin.

A companion to Lafayette, extremely floriferous. Flowers of a bright satin-like vermillion.

Good Bulbs 30/- per 100

Begonia Lafayette.

A beautiful dwarf habited bedding Begonia, wonderfully floriferous. Flowers dazzling scarlet-crimson, quite double, and produced in such profusion as to cover the plants.

Sound Bulbs 30/- per 100

Begonia marmorata.

Beautiful camellia-like single Begonias, each petal quaintly but prettily marbled and splashed with white.

Good Bulbs, mixed colours 40/- per 100

Begonia phosphorescens.

A grand bedding Begonia, with clear bright red double flowers, produced in immense numbers. It continues flowering right into the autumn, and is one of the freest flowering, most effective Begonias for bedding.

Large Bulbs 30/- per 100

Begonia President Savoy.

A good large erect double flowering bedding Begonia. In colour a distinct shade of salmon, tinted with copper.

Good Bulbs 50/- per 100

Begonia Washington.

A grand exhibition hybrid, with finely shaped double flowers of a brilliant red.

Good Bulbs 60/- per 100

Bougainvilleas.

Well-known popular conservatory and greenhouse plants. Of great value for cutting and decoration.

glabra, good plants	...	...	2/-, 3/- and 4/- each
var. Sanderiana, good plants	...	...	2/-, 3/- and 4/- each
var. Sanderiana variegata, a new variety with			
brightly variegated foliage		2/6 and 5/- each	
spectabilis, good plants	...	...	2/- each

Boronias elatior and megastigma.

We can supply good bushy plants of these pretty, sweet-scented winter flowering plants at 15/- and 18/- per doz.

Box Trees.

Extra well grown close-headed half-standards. Stems about 18 inches to 24 inches, heads about 26 inches. Price 20/- and 24/- per pair.

Camellias.

We have a very large and well assorted stock of these popular decorative plants. For Conservatory decoration, whether in tubs, pots or planted out, few plants equal them in beauty. The large symmetrical wax-like flowers contrast admirably with the deep glossy green of the foliage. They easily withstand several degrees of frost, hence can be used for planting in sheltered positions. Their neat habit and the immense quantities of large showy blossoms produced annually, render them very effective as isolated specimens on lawns, etc.

Bushy plants, about	12 inches, well budded	18/- per doz.
" " "	12 to 18 " " "	24/- per doz.
" " "	18 to 24 " " "	4/- each
" " "	24 to 30 " " "	7/6 each

Sizes and prices of specimen plants and our new special varieties on application.

ALBA PLENA—Double, white.

picta ...	...	...	...	...	...	5/- and 10/- each
Rex ...	...	...	...	...	...	5/- and 10/- each

Dracænas.

Our collection of Dracænas is grown as cool as possible, the very hardy ones being fully exposed except in the depths of winter. In consequence our plants are remarkable for their compact habits and are specially serviceable for decorative purposes.

Dracæna atrosanguinea.

A fine exhibition and decorative plant. Resembling *D. indivisa* in habit, but the foliage and whole plant is of a bright copper red.

Selected Plants, 2½ to 3 feet high 20/- and 25/- each
 Very fine Plants, about 3 feet high, extra well coloured, 40/- each

Dracæna australis.

A vigorous growing, hardy, green, broad-leaved species.

Strong Plants, about 15 inches high £4 and £5 per 100
 „ „ 15 inches to 18 inches high 12/- and 15/- per doz.
 „ „ 18 inches to 24 inches high 18/- and 30/- per doz.
 „ „ 30 inches to 36 inches high 36/-, 48/- and 60/- per doz.
 Well furnished Plants, 6 ft. high 20/- and 25/- each

Dracæna Bruanti.

Particularly effective for shop windows, halls, conservatories, etc. Free growing, green leaved.

Fine Plants, 12 inches to 15 inches high 7/- per doz.
 „ „ 15 inches to 18 inches high £3 per 100
 „ „ 18 inches to 24 inches high ... 10/- and 12/- per doz.
 „ „ 24 inches to 30 inches high ... 15/- and 18/- per doz.

Dracæna Cantleyi.

A distinct species, with broad green leaves, ornamented with light green yellow tinted eye-like spots.

Good Plants, 12 inches high ... 4/- and 5/- each
 „ „ 18 inches to 24 inches high ... 7/6 each

Dracæna congesta discolor.

Resembles Bruanti, but is not as vigorous in growth, and the young leaves are of a more pronounced red.

Strong Plants,	12 inches to 15 inches high	...	7/6	per doz.
„ „	15 inches to 18 inches high	...	12/-	per doz.

Dracæna Doucetti.

A beautifully variegated nearly hardy Dracæna, with long, narrow green and cream-yellow foliage. Habit somewhat resembling Indivisa, but more dense and graceful.

Strong Plants,	18 inches to 24 inches high	3/6, 5/- and 7/6	each
„ „	24 inches to 30 inches high	10/- and 15/-	each
„ „	30 inches to 36 inches high	20/- and 25/-	each
Specimen plants, size and price on application.			

Dracæna Godseffiana.

Ever popular on account of its distinct habit and its great hardiness for all decorative purposes. Wherever an Aspidistra can be used, so can this Dracæna. Its shining green leaves, maculated with creamy white and graceful branching habit give it unique advantages.

Good Plants,	6 inches to 12 inches high	...	1/6	each
„ „	9 inches to 12 inches high	...	2/-	each
„ „	12 inches to 18 inches high	3/6 and 5/-	each	

Dracæna Goldieana.

Quite apart from other Dracænas, resembling somewhat a Dieffenbachia in habit. The broad oval leaves are marbled in shades of green and silver.

Good Plants,	9 inches to 12 inches high	...	3/6	each
„ „	12 inches to 18 inches high	5/- and 7/6	each	

Dracæna indivisa.

Like australis, this handsome Dracæna is practically hardy, and this fact, combined with its graceful sword-like foliage, shading from green to russet red, render it very useful for winter decoration and out-door gardening in summer.

Well-furnished Plants, about 2 feet high	50/- per hundred
„ „ „ „ 2 ft. to 2½ feet high	75/- per hundred
„ „ „ „ 3 feet high	1/- and 2/- each
„ „ „ „ 3 ft. to 4 ft., in tubs,	4/- and 5/- each
„ „ „ „ 4 feet, in tubs	5/- each
„ „ „ „ 5 feet, in tubs	6/- each

Dracæna lentiginosa.

Strikingly handsome, with bold, re-curved foliage of a rich copper brown, nearly hardy.

Fine Plants, 24 inches to 30 inches high	...	...	7/6 each
„ „ 30 inches to 36 inches high	...	...	12/- each
„ „ 3½ feet to 4 feet high	...	...	20/- each

Specimen Plants, sizes and prices on application.

Dracæna Lindenii.

A stove species, probably a variety of fragrans, with green foliage, broadly marked and striped with yellow.

Good Plants, 9 inches to 12 inches high	...	18/- per doz.
„ „ 12 inches to 18 inches high	...	30/- per doz.

Dracæna Massangeana.

Very similar to D. Lindenii, but the foliage colours are arranged in irregular stripes.

Good Plants, 9 inches to 12 inches high	...	18/- per doz.
„ „ 12 inches to 18 inches high	...	30/- per doz.

Dracæna Parrei.

A stately variety, resembling *Australis* in habit, but with a deep sanguineous midrib, expanding into a triangular shape at the base of the leaf.

Specimen Plants, 3 ft. to 4 ft. high, in tubs ...	...	12/- each
„ „ 5 ft. high, in tubs ...	...	16/- each
„ „ 6 ft. high, in tubs ...	...	32/- each

Dracæna Prince Albert.

A novel and decidedly effective decorative plant, with long narrow cream-tinted foliage, striped with red, deepest at the base; very fine.

Good Plants, 15 inches high ...	...	10/6 each
---------------------------------	-----	-----------

Dracæna Sanderiana.

Quite distinct among *Dracænas*, producing slender erect stems, bearing from every node ornate leaves of glaucous green, banded and striped with cream yellow.

Well-furnished touffes, 9 inches high ...	...	18/- per doz.
„ „ „ 12 inches to 18 inches high	...	30/- per doz.
„ „ „ 18 inches to 24 inches high	...	42/- per doz.

Dracæna Schneideri.

Resembles *D. indivisa* in habit, but is beautifully striped and suffused with red.

Good Plants, 18 inches high ...	...	5/- each
„ „ 12 inches to 24 inches high	...	10/- and 12/- each
„ „ 24 inches to 30 inches high	...	15/- each

Dracæna Victoriæ.

A noble decorative plant, resembling *D. fragrans* in habit, but the foliage exhibits but little green, the greater part of each leaf being golden yellow.

Good Plants, 9 inches to 12 inches high ...	...	4/- each
„ „ 12 inches to 18 inches high	...	8/- each

Erythrina cristi-galli.

The scarlet cock's comb plant.

Strong Roots	...	...	...	...	...	12/- per doz.
--------------	-----	-----	-----	-----	-----	---------------

Eucharis Amazonica.

Good Sound Bulbs	...	...	...	...	10/- per dozen
------------------	-----	-----	-----	-----	----------------

Eugenia Australis.

The Australian myrtle. Large myrtle-like blossoms, freely produced.

Standards, 3 ft. stem, 2 ft. heads	...	...	...	10/- each
Pyramids, 4 ft. high, 2 ft. base	...	...	...	40/- each

Eugenia myriophylla.

A pretty stove decorative plant, with dark green larch-like foliage, closely set.

Good Plants, 6 inches to 9 inches high	...	...	...	3/6 each
--	-----	-----	-----	----------

Ficus pandurata.

A noble sub-tropical plant. Grand for summer gardening and useful at all seasons when a striking decorative plant is required. Foliage large, glossy green pandurate.

Fine Plants, 12 inches high	...	...	...	2/6 and 3/6 each
„ „ 24 inches high	...	...	...	5/-, 7/6 and 10/6 each

Genista.

Alba præcox, flowers white, early.

Good Bushes	...	...	...	...	18/- per doz.
-------------	-----	-----	-----	-----	---------------

Andreana, flowers bright yellow and rufous red.

Good Bushes	...	...	...	12/-, 15/- and 18/- per doz.
-------------	-----	-----	-----	------------------------------

Sanders' Gold Medal Hybrid Gladiolus.

NEW AND IMPROVED STRAIN.

The quality of our well-known, magnificent Hybrid Gladioli, Gold Medal strain, has by great care and selection been immensely improved, and this coming season's mixture will be a great advance in size of spike and individual flowers, substance, freedom of growth; and the many new shades and splendid forms that will appear among them—far more beautiful and intensely deep, rich colours than anything that has hitherto been seen in the finest Gladioli.

This new type is exceptionally free flowering, producing bold, massive spikes, with unusually large blossoms of great substance and exquisite colours, giving glorious effects in absolutely endless combinations, and embracing many quite novel and intensely beautiful floral developments.

LARGE FLOWERING BULBS

Per 100	...	...	...	...	6/-
Per 1,000	...	...	...	...	£2 10s.

Gloriosa Rothschildiana.

Flowers dark red, segments almost flat, most striking.

Fine Plants	...	...	...	...	10/6, 15/- and 21/- each
-------------	-----	-----	-----	-----	--------------------------

Gloriosa superba.

The climbing Lily. Sepals and petals orange and vermillion, curiously twisted.

Fine Plants	...	...	...	...	3/6, 5/- and 7/6 each
Fine Tubers	...	...	...	...	1/6, 2/6 and 3/6 each

Gloxinias.

An exceptionally fine exhibition strain, derived by careful selection from the best crassifolia forms. Flowers erect, very freely produced. In colours, from pure white to deep blood crimson and blue.

Fine Bulbs	...	...	...	...	...	8/- per 100
------------	-----	-----	-----	-----	-----	-------------

In separate colours, pure white, deep violet, rose, carmine, or white bordered, with red, rose, blue, or *vice versa*.

Fine Bulbs	...	...	...	...	...	10/- per 100
------------	-----	-----	-----	-----	-----	--------------

Hydrangea paniculata grandiflora.

Produces splendid pyramidal trusses of pure white blossoms.

Extra fine plants, 3 to 5 strong growths ... 26/- and 30/- per 100

Hydrangea Otaksa monstrosa.

Produces huge heads of pink blossoms. The largest of the Hortensis section.

Good Bushes 18/- per doz.

Hydrangea Thomas Hogg.

Fine for planting. Produces large corymbs of pure white flowers.

Good Bushes 12/- per doz.

Ixora coccinea.

A free flowering Ixora, producing large trusses of cinnabar orange.

Flowering size Plants 3/6 and 5/- each

Laurustinus (Viburnum tinus).

Strong, well-grown pot plants, beautiful subjects in flower.

Good Bushes, 18 inches to 24 inches high ... 2/- and 2/6 each

Half Standards, 12 inches stem, 18 inches heads 2/6 and 3/- each

Half Standards, 24 inches to 30 inches stem,

24 inches to 30 inches heads 10/- each

Lilacs.

SPECIALLY GROWN FOR FORCING.

Bushy, well hardened plants, set with flower buds.

Charles X. and Marie Legraye 150/- per hundred

Cassimier Perrier, Mdme. Lemoine, Presdt. Grevy

and other double-flowered varieties ... 24/- per doz.

Marantas.

Beautiful stove foliage plants. The leaves exhibit the most varied and exquisite hues, harmoniously combined and blended. They are most effective for Exhibition purposes, contrasting well with both flowers and other foliage plants.—24/-, 36/- and 48/- per doz.

- ALBERTII—Compact habit. Small dark green foliage, with an irregular feathery silver zone; purplish beneath.
- ARGYRÆA—Tall growing with graceful silvery green foliage, reddish purple beneath.
- ARRECTA—Very elegant. Tall slender stalks bear narrow elegant leaves of deep satin green, shaded with silvery green.
- BACHEMIANA—A pretty dwarf habited species, with narrow lanceolate leaves, glaucous green, with deep green orate blotches.
- EXIMIA—Dwarf habit, massive foliage, glaucous green, with broad stripes of dark green, extending from mid-rib.
- GOULETTI—Dwarf growing. Leaves of a beautiful glaucous silver, bordered with dark green; under surface red purple.
- HIEROGLYPHICA—Broad rounded foliage of dark green, irregularly marked with silver and darker green. Dwarf habit.
- ILLUSTRIS—Resembling roseo picta in shape, but has deep feather-like markings on both sides of the mid-rib of glaucous green.
- INCONIFERA—Dwarf habit, foliage light green, with deep green ovate blotches regularly disposed on both sides of the mid-rib.
- INSIGNIS—Very graceful, lance-shaped foliage of light green, with alternate large and small deep green oval blotches on both sides of the mid-rib.
- JAGONIANA—Tall growing. Foliage soft green, with deep velvety green blotches, extending from mid-rib to edge.
- KEGELJANI—Strong growing and effective, with silvery green leaves, ornamented with dusky green ovate blotches.
- LEITZII—Pretty and curious, in that it produces young plants on the apex of leaf like stalks. Foliage dark green with irregular light green central blotches.
- LEOPARDINA—Dwarf growing, with small, pretty foliage of light yellow tinted green, with deep glossy ovate blotches.
- MEDIO PICTA—Dwarf habit. Leaves dark glossy green, with a central feather-like stripe of silvery white.
- MOZELLI—Neat habit, with broad, rounded foliage, purple beneath and dark green above, with three longitudinal zones of silver green.
- OPPENHEIMII—Dwarf growing. Leaves dark green, with spear-like markings of glaucous green.

- REGALIS—A splendid companion to *M. Sanderiana*, which it strongly resembles, but the foliage is more lanceolate and the stripes are brighter in tint.
- ROSEO PICTA—Strong growing. Leaves broad, rounded, olive green, with an irregular silvery zone extending round the leaves about an inch from the edge, and a central rose tinted zone.
- SANDERIANA—A noble species, with deep, glossy, metallic green leaves, horizontally barred with bright rose pink stripes, extending from the mid-rib.
- VAN DER HECKII—Tall, stately habit. Leaves dark dusky green, with three irregular central bands of glaucous green.
- VITTATA—Very conspicuous, of compact habit, with olive green leaves, almost covered with whitish stripes extending from the mid-rib.
- WARSCIEWICZII—Tall growing. Under surface purplish red. The upper beautifully marked with eight dark velvety green blotches on a lighter ground.
- WIOTI—Dwarf habit, very pretty. The leaves bear eight dark green oval blotches on a light green ground.
- ZEBRINA—Well known and very popular. Foliage banded in dark and light velvety green; reddish beneath.

Metrosideros semperflorens.

The bottle brush plant. Inflorescence glowing scarlet, shaped like a bottle brush, very charming.

The Tubs have strong iron handles, excepting the four smaller sizes. Iron handles can be placed on to these, if desired, at an extra charge of 2d. per Tub.

These well-made, carefully finished, tubs are of great value for large Palms, Bay Trees, Conifers, Decorative Shrubs, etc.

They add greatly to the attractiveness of any plants placed in them, are far more easily handled than pots, and cannot be easily cracked or broken.

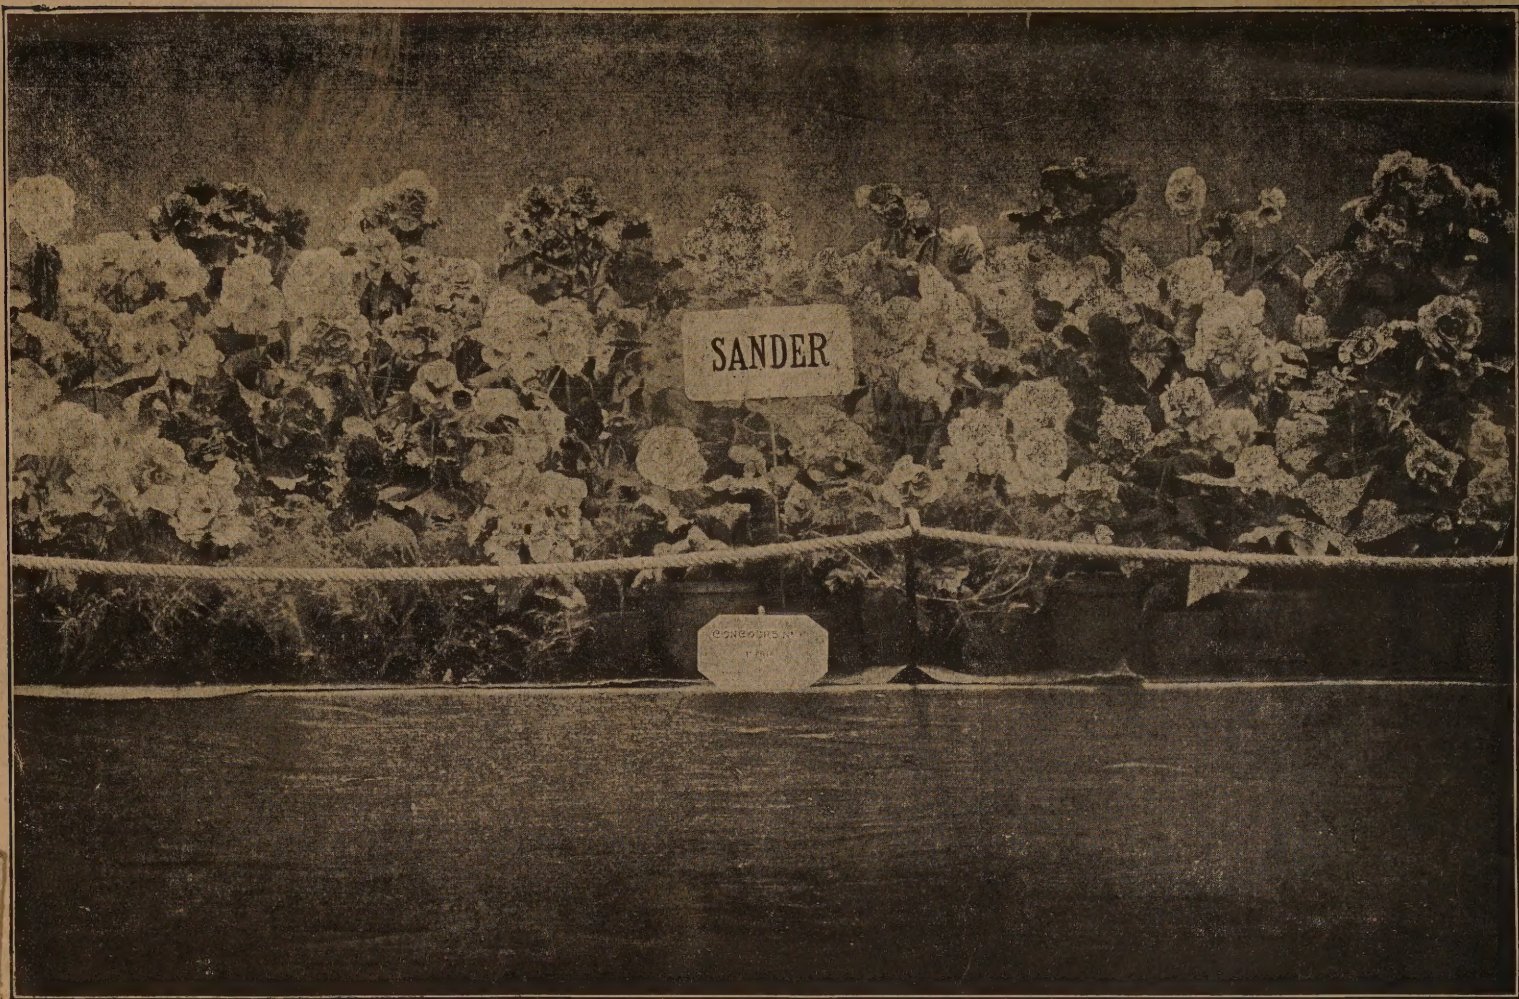

CROTON FRED SANDER.

Award of Merit at Temple Show, 1908.

This is the brightest, best, and absolutely the most beautiful of all the trilobed Crotons. It is the acme of perfection, and as an exhibition and table plant it is perfect. The golden colouring of the leaves is so pure and brilliant in its setting of bright, glossy green, that it at once commands and rivets attention by its exquisite and captivating elegance. Three parts of the whole of the leaves and stem of the plant are of a deep yellow colour, eclipsing in its brilliancy every other kind of Croton known.

The plant retains its leaves to the pot rim, clear and bright, far longer than in any other kind. As an ornamental, decorative plant, it is indispensable. We can truly say that it is unapproached and unapproachable, for brilliancy of colouring, habit, and decorative excellence. **Price 30s. per dozen.**

GOLD MEDAL GROUP OF BEGONIAS.
